

QueueOS by MovionX

Queue management system for clinics and service locations

A practical pilot-first QMS for physical locations where people wait to be served.

What it does

- Ticket creation
- Operator dashboard
- Waiting-room display
- Services and counters
- Admin setup
- Pilot deployment support

First pilot scope

- One location
- One display
- Reception + operators
- Basic services/counters
- Staff walkthrough
- Feedback adjustments

Optional pilot items

- Ticket printer
- Tablet/kiosk check-in
- Local server
- Cloud deployment
- Custom workflow
